• JUNIOR FULLSTACK DEVELOPER •

PROFESSIONAL SKILLS

Python, CSS, HTML, JavaScript, Git, GitHub, Django, Bootstrap, SQL Database, PHP, APIs using Django Rest Framework, AWS, PostgreSQL, Docker, PyCharm, VScode.

PERSONAL SKILLS

Team player
Quick learner
Self Motivated
Communicative
Organized
Natural Problem Solver

ACHIEVEMENTS

Fluent in 6 languages.

Achieved a 2:1 on my Open University degree, with a full time teaching job and learning to code.

Won first prize in "Women in Tech" Hackathon in November 2021

Creative, analytical and curious developer with a passion for user friendly tech. I have a strong drive to constantly learn and evolve, which has led me to try on new roles and projects in my professional life - and to reschool into tech from a background of teaching. I am motivated by being challenged, seeing clear results of my work and by creating value for others. I have great ability to run my work independently, while I really appreciate being part of a team and working together towards common goals.

EDUCATION

Full Stack Software Development

Code Institute (in cooperation with Napier University, Scotland)

Sep 2021 - Present

- University credit rated remote bootcamp
- Focused on gaining skills in problem solving and delivering with high quality within a fixed time-frame.
- The students are examined based on 4 individual projects ranging from a static frontend site to a full stack e-commerce site - including the entire flow from UX and design to development and testing.
- Covers a wide range of technologies and frameworks, such as: HTML, CSS, Bootstrap, JavaScript, jQuery, API:s, Python and Django.
- Git is used for version control and Stripe for payment services.
- Developing in teams are practised through 'Hackathons' where the students work together on planning and building an application.

Bachelor's degree in Languages and business management

Open University

July 2017 - July 2021

- broad understanding of business organisation
 - The program also cover areas such as markets, customers, finance, operations, information technology, business policy and strategy.
